

# SE OH

## FRONT END DEVELOPER

### Profile

I am an ex-hotelier turned front end developer who loves solving problems and learning new technologies along the way. I'm incredibly passionate about creating apps that make everyone's life more convenient.

Bootstrap	React	MongoDB
JavaScript	Node.js	Github
jQuery	Express	Heroku

### Referee

Available upon request

### Experience

#### GENERAL ASSEMBLY

Software Engineering Immersive | Aug 2019 - Feb 2020

- Project 3  
<https://shklsh.github.io/coffee-finder/>  
"Coffee Finder" app that search for cafes based on user specified location and displaying its information such as location, distance and user rating. Built with React and Google Maps APIs
- Project 2  
SNS app where you can follow people, read their posts, and comment on it. Similar to Facebook. Built with React, Ruby on Rails, and PostgreSQL
- Project 1  
<https://coffee-meets-human.herokuapp.com/>  
Social blog app where you can create a post to meet new people over a coffee. Built with Ruby on Rails, HTML, CSS, and PostgreSQL
- Project 0  
<https://shklsh.github.io/to-do-app/>  
"To-do-list" app that allows the user to track tasks and mark them off as completed. Built with JavaScript, jQuery, HTML, and CSS

#### MERITON SUITES
